Corrosion Test

Hot Shot's Secret 100% Synthetic Never Rust Spray Lubricant and Multi-Purpose Spray Lubricant were tested for corrosion by an independent laboratory against 13 top competitors. A Salt Fog Corrosion test, ASTM Method B-117 was used to compare each of the products. The fog chamber is set up to simulate 100% humidity with a synthetic seawater fog on three carbon plates that have been sanded down and coated with each product. The panels are then monitored for corrosion and total time was recorded for each sample when corrosion first appears.
